- Scrum Master for next week

  - Racquel

- List at least 5 things the team did well and will continue doing

  - Great work catching up, worked through obstacles, other team members tag teamed to aid scrum master, attempted to meet as much as possible, began working ahead on visuals.

- List at least 3 things the team did poorly and how you will mitigate them next sprint

  - Punctuality to meetings, personal obstacles have impacted overall team negatively, need to meet more and work together. Will push harder to stay on task and finish all tasks on time.

- List shout-outs to any team members for excelling in any way

  - Racquel has been a rockstar keeping the team ahead of the curve by working ahead and tackling some tasks from following week.

- What did you learn as a team this week?

  - We had refreshers on Tableau and data exploration.

- What did you learn as an individual this week?

  - Working ahead on when possible is very helpful for those weeks when you hit obstacles.

Code Review
Please submit all project documents related to your efforts this week, including all code used. If you used Tableau, please take screenshots. Your code will be graded on the following four criteria:

- Does your code run smoothly from the top to the bottom of the file?

  - Yes it does.

- Do you have comments explaining what you're doing before you do it?

  - Yes

- Are you working on the appropriate weekly task (i.e. data exploration)?

  - Yes we are.

- Do you have comments explaining your interpretation of the code results (if applicable) after the code?

  - Yes.
